ARCHITECTURAL PRODUCTS

ERCON has a range of architectural products for office, home, villa, resorts, hotels, and other places. Strong & Aesthetically good these products are long lasting Green products.

Ercon Composites and its sister concerns have forayed into the challenging sector of architectural products, where aesthetics matter a lot and quality is vital. Since these two have been the core strength of ERCON products for long, it was, but natural for ERCON to move in this sector. Now ERCON is producing many products, custom made to the designs given by architects or end users.

Ercon's team of Engineers take great care to meet the looks as defined by the architects along with the strength requirements of the structures so designed.

Many products like Main Gates, Doors, Fencings, Window Grills, Garden Benches, Pergolas, Gazebos, Lighting Poles, Walkway Bridges, etc., find use in houses, offices, factories, Villa, resorts & hotels etc. Partitions for offices, creative partitions for Bathrooms & Designer dustbins for hotels and parks for improving aesthetics are also made.

Main Gates, Window Grills, Fencing and Doors are great products as they are not only corrosion resistant, but being light weight, high strength they provide good security too.

Small walkway bridges, over water bodies/big drains, for Gardens are light weight & easy to install and add to aesthetics, with long life.

Garden Tables, Benches, Lighting poles, Pergolas, Deck floorings etc. are all long life products with great aesthetics.

Ercon products are available in Wood finish as well as modern finishes.

Products like FRP gratings can be used around swimming pools, for drain covers in walkway areas, drive ways & parkings. WPC products like deck floorings can be used around swimming pools, pathways in gardens, for personal sitting areas under Gazebos & Pergolas made of WPC too. Hand-rails of WPC and products like Pergolas, Gazebos and Floorings etc. give a natural wood look to your environmental surroundings.
