

ERCON MONTHLY

April 22, 2012

ERCON starts a new range of Wood Polymer Composite products in its sister concern CHIRAG ENTERPRISES.

Revolutionizing Garden Decor wood polymer composites

By Mukul Maheshwari

CHIRAG ENTERPRISES, sister concern of ERCON COMPOSITES has started an entirely new range of products, set to revolutionize the World of Landscape Architecture.

With a long range of FRP products the new products of Wood Polymer Composites was a natural line of expansion.

We at Chirag are now integrating the products from different technologies giving birth to an entirely new range of strong and aesthetically beautiful products.

The new material has the looks of wood and is durable. It is not affected by termites, fungus, & water. It does not require maintenance like wood and other products.

The new range of products includes decking/flooring, pergolas, gazebos, hand rails, fencing, garden benches, tables, dustbins, flower pots etc.

These products have all out door applications and are suitable in all weather conditions.

These products are finding good applications in the Hotels, Resorts,

Garden Restaurants, Housing colonies, Farm Houses, Parks, Villas, Gardens. and many other places.
